

2016

COMMUNITY HEALTH NEEDS ASSESSMENT

EXECUTIVE SUMMARY
Community Health Needs Assessment, 2016 Update

Purpose of the Community Health Needs Assessment

This 2016 Community Health Needs Assessment (CHNA) updates the CHNA completed in 2013 to meet the requirements of Section 9007 of the 2010 federal law, The Affordable Care Act (“ACA”). The ACA requires that any tax-exempt, IRS-designated 501(c) (3) hospital complete or update a publicly-available, comprehensive CHNA every three years in order to document the extent to which it understands the unique characteristics and needs of the local communities it serves, and responds to these needs by delivering meaningful and effective community benefit through clinical services and other programming.

Required Components

A CHNA report has five required components:

- 1) Definition of community served
- 2) A prioritized description of the significant health needs of the community
- 3) Transparency in the process and methods used to conduct the CHNA, including how it took into account input from the community served and prioritized community health needs
- 4) A description of the resources potentially available to address the identified significant prioritized community health needs
- 5) An evaluation of the impact of actions taken to address the significant health needs identified in the previous CHNA report (June 2013).

A CHNA report is considered complete when it is adopted by a governing body of the facility and made widely available to the public.

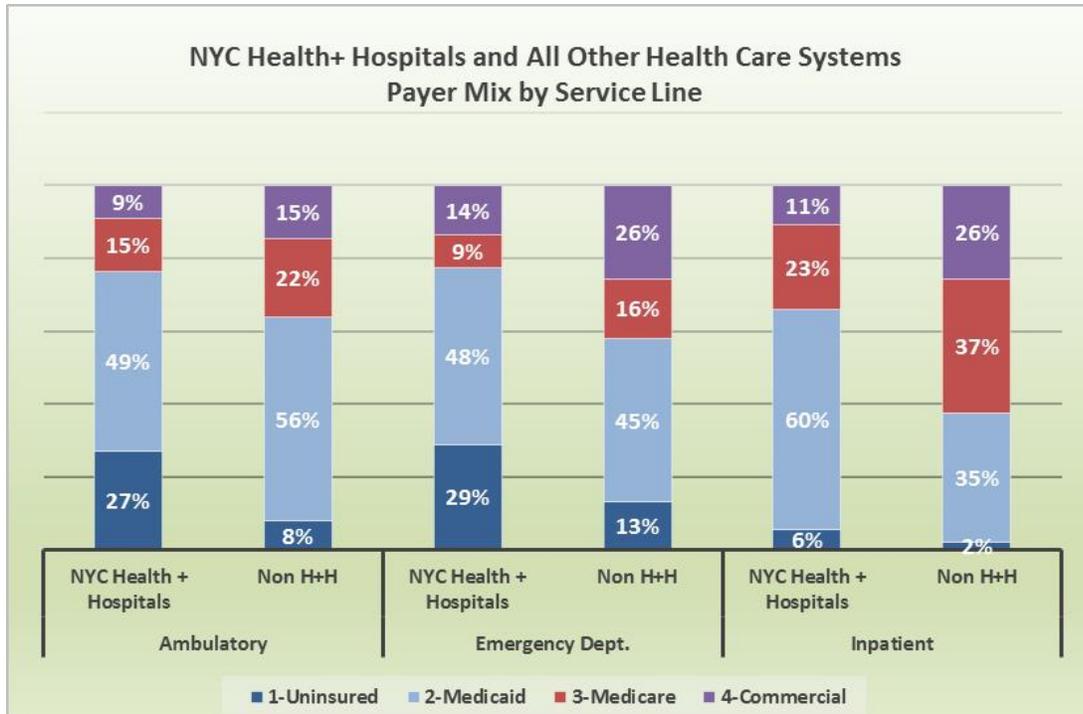

Community Served

NYC Health + Hospitals serve all New Yorkers in every neighborhood in New York City regardless of their ability to pay. Addressing disparity throughout New York City, NYC Health + Hospitals is *the* safety-net for the uninsured and underserved in New York City.

As a share of its total volume, NYC Health + Hospitals provides three times greater share of ambulatory care to the uninsured than other New York City hospitals (27% and 8%, respectively) and twice as many ED visits (29% and 13%, respectively). Medicaid

and uninsured patients together account for nearly twice as many hospital stays compared to other New York City hospitals (66% and 37%, respectively) (chart 1).

Chart 1: NYC Health + Hospitals Payer Mix by Service

Sources and notes: 2014 Hospital Institutional Cost Report, 2014 DTC Cost Report for HHC using internal data, and 2013 Health Center Cost Report for all other DTCs. Includes all NYC acute, general care hospitals and related wholly owned or controlled community health centers, including HHC DTCs. Discharges exclude normal newborns. ED visits include treat and release, and visits that result in admission. Clinic visits include comprehensive care and primary care visits only.

The service area of individual hospitals in the NYC Health + Hospitals System are identified in Appendix 1. A description of these communities, including demographic characteristics identifying vulnerable populations such as disabled and residency status; and health status such as chronic disease prevalence and the rate of potentially avoidable emergency health care use, is in Appendix 2.

Process and Methods

The process and methods was designed collaboratively by a work group of facility planning directors and other representatives.

The community served by each acute care facility is defined as the geographic area in which 75% of its ambulatory care patients reside. An initial list of over 40 health needs were identified based on a review of published literature and internal analyses that have been made publically available including the 2013 CHNA and the DSRIP Community Needs Assessment. Incorporating input from other facility representatives and pilot

tested with hospital users, this list was refined to 13 community health needs. Input from facility users (approximately 150 per facility were surveyed), Community Advisory Boards, facility leadership, and the prevalence of these health needs within the community were blended together to prioritize the health needs. The five highest priority community needs were considered *significant*.

Prioritized Significant Community Health Needs

All 13 identified community health needs were identified as important within the hospitals' communities according to community input. Those considered most significant and their priority order in accordance with regulatory requirements are indicated in blue in the table below. Hypertension/high blood pressure and diabetes are significant community health needs at all hospitals; obesity and heart disease are significant at the majority of hospitals (Chart 2).

Chart 2: Community Health Need by Hospital

	Bellevue	Carter	Coney Island	Elmhurst	Harlem	Jacobi	Kings County	Lincoln	Metro-politan	NCB	Queens	Woodhull

Comparison of 2013 and 2016 Significant Community Health Needs

Most of the significant community health needs identified in 2013 were again identified in 2016. In both 2013 and 2016, a large number of hospitals identified diabetes, hypertension/high blood pressure, heart disease, obesity, mental illness and asthma as a significant community health need.

HIV/AIDS and other infectious diseases were considered a significant community health need at five hospitals in 2013, but none considered it among their most significant in 2016. A decrease in importance is consistent with the continued progress in reducing HIV/AIDS diagnoses and deaths in NYC.

Other changes in health needs between 2013 and 2016 are partly attributable to changes in federal requirements regarding methodology (see Process and Methods).

Significant Community Health Needs Identified in 2016 and 2013

	Significant Community Health Needs	
	Number of Hospitals Identified in 2016	Number of Hospitals Identified in 2013
Diabetes	12	12
Hypertension / High Blood Pressure	12	10
Heart Disease, High Cholesterol, Stroke	9	10
Obesity	8	8
Mental illness	6	10
Asthma and other Breathing Issues	5	5
Alcohol and/or Drug Use	3	9
Cancer	3	6
Smoking	3	1
Dementia	1	1
HIV/AIDS, Hepatitis, STDs	0	5
Violence	0	2
Premature Births, Low Birth Weight	0	1

Resources Potentially Available

Appendix 4 is a listing of health and social service organizations available to members of low-income, medically underserved, and other minority populations in the neighborhoods included in the primary service area of NYC Health + Hospitals, by borough and sorted by neighborhood. These populations may experience health disparity or are at risk of not receiving medical care as a result of being uninsured or underinsured or due to geographic, language, financial, immigration status, or other barriers. Organization services provided are arranged accordingly into the following categories: Dental, Vision, Adult Day Health, Health center, Insurance enrollment, Home Health, Hospital, Nursing Home, Prescription Drug, Immigration Support, Mental Health-Inpatient, Mental Health-Ambulatory, Substance Use, Social Services, Financial Assistance, and Wellness/Prevention.

Evaluation of 2013 Implementation Plan

NYC Health + Hospitals evaluated each hospital's 2013 Implementation Plan and the impact of specific interventions that addressed identified health care needs (Appendix 3). Included in the evaluation is a list of the significant health needs identified in 2013, a description of the planned activities that addressed each of the health needs, an indication whether the planned activity was implemented, the target population and goal of the activity, and the impact or outcome of the activity.

2016 Implementation Strategy

The 2016 CHNA Implementation Strategy due in November 2016 will be designed to address the prioritized significant community health needs identified in the 2016 CHNA and must be adopted by the hospital's governing body.

PROCESS AND METHODS

Community Served

Each hospital's primary and secondary service area is defined as the zip codes that comprise the residence of 50%, 75% of its ambulatory patients, respectively.

Community Input

Community input was obtained using three different strategies:

1) Community Advisory Board

Community Advisory Boards (CAB) are the formal and direct links between each NYC Health + Hospitals facility and its patients and local advocates. The CAB members, consisting of residents, patients and community workers, represent the views of the community in the health care facility's decision making-process to ensure access to the best possible medical care in their communities. The CAB members provide vital insight on the development of facility plans and programs, as well as keep the community informed of NYC Health + Hospitals' goals and objectives. All hospitals in the NYC Health + Hospitals system have a CAB which meets on a regular basis.

The CHNA report and process was presented to each CAB individually. A survey was administered anonymously and confidentially to each CAB member which asked them to indicate the relative importance of each of the 13 identified community health needs in their community (see survey instrument in appendix 6). These responses were coded for inclusion in the prioritization matrix. CAB members were also asked to provide additional input beyond the survey question.

2) Facility Users

NYC Health + Hospitals engaged approximately 150 adult facility users from each hospital throughout the main facility and within community-based clinic sites. These individuals completed a survey anonymously and confidentially with questions focused on demographics, health insurance status, language preferences, health concerns, primary and preventive health care utilization, barriers in obtaining ambulatory care and reasons for use of emergency care. Respondents were also asked to indicate the relative importance of each of the 13 identified community health needs in their community. These responses were coded for inclusion in the prioritization matrix.

Surveys were self-administered or administered by facility staff. The surveys were translated into NYC Health + Hospitals' top 7 languages: Bengali, Chinese (simplified),

Haitian-Creole, French, Polish, Russian and Spanish. Participants received a two-trip Metrocard valued at \$5.50 for completing the survey (see survey instrument in Appendix 5).

3) Additional Community Engagement

NYC Health + Hospitals completed a community needs assessment in December 2014 as a requirement to participate in the Delivery System Reform Incentive Payment (DSRIP) program, a statewide initiative that focuses on improving health care delivery promoting community-level collaborations to ensure that Medicaid and uninsured populations receive culturally competent, highly integrated, well-coordinated, and easily accessible health services. As part of this needs assessment, the system collaborated with government agencies, numerous community organizations, engaged experts in the community and conducted focus groups with vulnerable populations. Key informant interviews were conducted with community experts having population-specific expertise, including particular immigrant groups, older adults, children and adolescents or expertise in specific issues, including supportive housing, care coordination, corrections, and homelessness (conducted as part of the NYC Health + Hospitals DSRIP Community Needs Assessment). Focus groups were conducted with community members recruited by community organizations which included targeted vulnerable groups such as older adults, local immigrant groups, LGBTQ and individuals with disabilities.

Additional Resources

4) Facility Leadership

Hospital leadership were engaged to support the initial identification of potential community health needs, and refine the list to 13 needs which were used in hospital user and CAB member surveys. In addition, a survey was administered to hospital leaders which asked them to indicate the relative importance of each of the 13 identified community health needs in their service area (see survey instrument in Appendix 6). Finally, hospital leaders were asked to review the list of significant health needs identified by the CHNA process.

5) Publically available community health, socio-demographic, economic data

The CHNA work group reviewed all publically available data and supplemented with review of public health literature prepared by New York City of Department of Health and Mental Hygiene (including Take Care New York 2020); New York State Department of Health (including NYS Prevention Agenda 2013-2018); federal agencies, Centers for

Disease Control and Prevention and Healthy People 2020. Sources of Data and Brief Description include:

- American Academy of Family Physicians UDS Mapper
 - UDS Mapper provides ZIP code-level age-adjusted mortality estimates and prevalence estimates on health care access and chronic condition. Can be accessed at: <http://www.udsmapper.org/>.
- Emory University Rollins School of Public Health AIDS Vu
 - AIDS Vu provides ZIP code-level incidence and prevalence data on HIV/AIDS as of 2012. Can be accessed at: <http://aidsvu.org/>.
- New York State Department of Health Cancer Registry
 - The NYS Cancer Registry provides ZIP code-level age-adjusted estimates on incidence of the top malignant cancers (colorectal, female breast, lung and bronchus and prostate) as of 2008-2012. Can be accessed at: <https://www.health.ny.gov/statistics/cancer/registry/zipcode/index.htm>.
- New York State Department of Health DSRIP Performance data
 - The New York State Department of Health provides key statistics on the health care utilization and health status of Medicaid beneficiaries in calendar year 2012. Can be accessed at: https://www.health.ny.gov/health_care/medicaid/redesign/dsrip/performance_data/.
- New York State Department of Health Vital Statistics
 - NYS Vital Statistics provides ZIP-code level key perinatal statistics including access to prenatal care and birth outcomes as of 2011-2013. Can be accessed at: <http://www.health.ny.gov/statistics/chac/perinatal/county/2011-2013/>.
- New York Department of Health and Mental Hygiene (DOHMH) Community Health Survey (CHS)
 - CHS is a telephone survey conducted annually by DOHMH and provides data on the health of New Yorkers, including prevalence estimates on a broad range of chronic condition, health care utilization and other behavioral risk factors. 2010 through 2014 data are used in this report. Can be accessed at: <https://a816-healthpsi.nyc.gov/epiquery/CHS/CHSXIndex.html>.
- New York Department of Health and Mental Hygiene Vital Statistics
 - DOHMH vital statistics data provides 2013 age-adjusted mortality data by cause and by neighborhood. Can be accessed at <https://a816-healthpsi.nyc.gov/epiquery/VS/index.html>.
- United States Census American Community Survey (ACS) 5-year estimates

- ACS provides ZIP code-level demographic, economic, social and housing data as of 2008-2012, and 2010-2014. Can be accessed at: <http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml>.

Process and Criteria to Identify Health Needs

A work group composed of central office corporate planning staff, facility planning directors and other facility representatives from all hospitals in the NYC Health + Hospitals system was formed in April 2015 and met monthly to coordinate and conduct the CHNA process. To identify community health needs, the work group reviewed documentation from city, state and federal public health resources, including but not limited to Take Care New York 2020, New York State Prevention Agenda 2013-2018 and Healthy People 2020. The work group also reviewed facility 2013 CHNA and NYC Health + Hospitals DSRIP Community Needs Assessment reports. From this literature review, a list of over 40 potential community health needs were identified. To refine the list, the work group solicited input from other facility representatives and pilot tested the list with hospital users using a survey. The result of this process identified 13 community health needs as indicated below (note: this is not in priority order):

1. Heart disease, high cholesterol, stroke
2. Cancer
3. Diabetes
4. Asthma and other breathing issues
5. Hypertension/ high blood pressure
6. Violence
7. Mental illness and psychiatric disorders
8. Dementia including Alzheimer's
9. Obesity
10. Premature births, low birth weight
11. HIV, Hepatitis, STDs
12. Alcohol and/or drug use
13. Smoking

Prioritization of Community Health Needs

Hospitals developed their facility specific community health needs prioritization by ranking the community needs as determined by facility users, CAB members, hospital leaders, and the prevalence of the conditions within their respective communities – independently - to create an overall blended rank score of each community health need.

Facility users, CAB members, and hospital leaders completed a survey which asked them to rate each of the community health needs using the criteria: “Very Serious” = 3; “Somewhat Serious” = 2; “Not Serious” = 1. The option, “Don’t Know/Not Applicable” was also provided and were excluded for that health need score.

Condition prevalence within the hospital service area was also a considered in prioritizing the community health needs. A ‘z’ score, which represents the distance/variance between the raw score (service area average) and the population mean (citywide average) in units of the standard deviation was calculated for each condition prevalence. A positive number suggests that service area experiences more prevalence in the area than the rest of the city, while a negative number suggest that there is less prevalence in the area relative to other NYC neighborhoods.

Each of the community health needs were assigned a rank from 1 to 13 by each of the three groups – hospital users, CAB members, and hospital leaders – based on their survey results. Community health needs were also assigned a rank from 1 to 13 based on their prevalence, using ‘z’ scores. Finally, each of the four ranks (Users, CAB members, hospital leaders, and prevalence) were added together and health issues were re-ranked based on their overall score.

Community health needs that were considered *significant* were ranked among the top five of identified needs. The final list, including the identified significant community health needs, were reviewed by hospital leadership.

APPROVAL

The Community Health Needs Assessment, 2016 Update, was adopted by the Board of Directors of NYC Health + Hospitals on June 30, 2016.

Written comments may be submitted via email to: chna@nychhc.org

Appendix 1: Description of NYC Health + Hospitals / Bellevue and Community Served

Located on an 11-acre campus based on First Avenue and 27th Street in the Gramercy Park-Murray Hill neighborhood in Manhattan, NYC Health + Hospitals / Bellevue serves a diverse patient population from communities throughout the New York metropolitan area service area which includes the neighborhoods of Bedford Stuyvesant /Crown Heights, Chelsea/Clinton, East Harlem, East New York, Flatbush/E. Flatbush, Gramercy Park/Murray Hill, Greenpoint, Highbridge/Morrisania, Long Island City/Astoria, Ridgewood/Forest Hills, Sunset Park, Union Sq./Lower East Side, West Queens, and Williamsburg/Bushwick.¹ The map below shows the primary service area in red. Bellevue is labeled in red and other NYC Health + Hospitals sites are in gray. The NYC Health + Hospitals / Bellevue service area encompasses many neighborhoods that the federal Health Resources and Services Administration (HRSA) has identified as being medically underserved and/or or having a shortage of health providers (HPSA) and also has a facility-specific mental health HPSA designation for high average daily census and workload.²

¹ Bellevue's Service area is defined as the Zip codes that comprise the residence of 50% of its ambulatory patients, respectively and includes the zip codes: 10001, 10002, 10009, 10010, 10011, 10016, 10029, 10035, 10036, 10456, 11106, 11206, 11207, 11208, 11211, 11212, 11220, 11221, 11226, 11233, 11237, 11368, 11370, 11372, 11373, 11377, and 11385.

² A Medically Underserved Area /Population (MUA/P) designation applies to a neighborhood or collection of census tracts based on four factors: the ratio of primary medical care physicians per 1,000 population, infant mortality rate, percentage of the population with incomes below the poverty level, and percentage of the population age 65 or over. A Healthcare Provider Shortage Area (HPSA) is a collection of census tracts that has been designated as having a shortage of health professionals. There are three categories of HPSAs: primary care (shortage of primary care clinicians), dental (shortage of oral health professionals), and mental health (shortage of mental health professionals).

NYC Health + Hospitals / Bellevue provides a disproportionate share of services for the borough's low income and uninsured population. In 2014, 30% of its ambulatory visits, and 36% of its ED visits were uninsured compared to 5% and 13% at Voluntary hospitals in Manhattan. In addition, 61% of its inpatient discharges were either uninsured or enrolled in Medicaid, compared to 26% at Voluntary hospitals in Manhattan.

Sources and Notes: 2014 Hospital Institutional Cost Report, 2014 DTC Cost Report for HHC using internal data, and 2013 Health Center Cost Report for all other DTCs. Includes all NYC acute, general care hospitals and related wholly owned or controlled community health centers, including HHC DTCs. Discharges exclude normal newborns. ED visits include treat and release, and visits that result in admission. Clinic visits include comprehensive care and primary care visits only.

Facility Size and Patient Volume

With 132,421 patients and 645,330 encounters (FY 2015), NYC Health + Hospitals / Bellevue is a full service hospital with 912 certified beds. In FY 2015, it had 30,000 discharges including 1,300 newborn deliveries, 112,000 Emergency Department visits, and 502,000 ambulatory visits.

Inpatient Services

	Certified Beds	Discharges

Potentially Preventable Visits (PPVs), based on proprietary 3M software, are emergency visits for ambulatory care sensitive conditions (ACSC) that may result from a lack of adequate access to care or ambulatory care coordination. These ambulatory sensitive conditions could be reduced or eliminated with adequate patient monitoring and follow up. Unlike with PQIs, which can be disease specific, there is only one PPV indicator which represents all potentially avoidable ED visit regardless of condition or disease.

PPV Events are observed or "actual" ED visits that meet the criteria of an ACSC visit as defined by the 3M software. The Observed Rate is the number of PPV events divided by the population. Risk Adjusted Expected Visits are PPV visits adjusted by age, gender and race/ethnicity. The Expected rate is the number of Expected visits divided by the population. Risk Adjusted Expected Rate is the observed PPV rate divided by the expected PPV rate, multiplied by the statewide PPV rate. A lower number is better.

* Preterm Births –prior to 37 weeks of gestation; Low Birth Weight– weight between 100-2499 grams; Late or No Prenatal care– initiated during the third trimester of pregnancy or not at all; Teen Birth – Births to females ages 15-19; Infant Deaths –occurred at less than twelve months of age; Neonatal Deaths –occurred at less than 28 days of age. Total Births are over three year time period.

Appendix 3. Evaluation of 2013 Implementation Plan

Significant Health Need Identified in 2013 CHNA	Planned Activities Listed in the 2013 Implementation Strategy	Was the Activity Implemented? (Yes/No)	Result or Impact	Supporting Data and Data Sources
Mental Illness	Increase depression screening in the Primary Care setting for adults and children	Yes	Bellevue has significantly increased the numbers of patients screened in the primary care setting resulting in a 12% case finding for appropriate depression screenings. There has been a significant increase in referrals to the psychiatrist and social worker embedded in Primary Care	Quadramed
Mental Illness	Integrate behavioral health practitioners within Primary Care to Provide "One-Stop" Model of Care	Yes	An additional supervising psychiatrists as well as Psychiatric Nurse Practitioner have been added to the Adult Primary Care team. Additionally an internist is now embedded in the out patient psychiatry department	Chief of Psychiatry and Chief of Internal Medicine
Mental Illness	Deploy Breakthrough/Lean Methodology of Performance Improvement to Reduce Delays for Appointments and to Reduce Delays on the Day of the Appointment	Yes	A number of Breakthrough events were conducted in Out Patient Psychiatry which has resulted in a decrease TNAA of 8 days to 5 days for new visits and from 5 days to 3 days for revisits. Decreases were 37.5% and 40% respectively.	Soarian
Mental Illness	Create Patient Panels to Ensure Continuity Between Patient and Primary Care Provider	Yes	The Childrens Comprehensive Psychiatric Emergency Program was opened resulting in 1360 visits in FY2015. These visits lead to 653 pediatric inpatient psychiatric admissions. The pediatric CPEP has drastically altered emergency psychiatric care throughout the city in a positive way.	Business Intelligence
Mental Illness	Establish the only Children's Comprehensive Psychiatric Emergency Program (CPEP) in NYC	Yes	Approximately 5,000 patients are managed through the use of the Diabetes Registry resulting in a greater portion of patients being in compliance with treatment and maintaining appropriate levels of care.	
Diabetes	Coordinate Care and Patient Education through Diabetes Registry	Yes	All Adult Diabetic Patients are referred to the Primary Care practice. A physician dashboard was created to enable tracking of diabetic patients resulting in a greater portion of patients being in compliance with treatment and maintaining appropriate levels of care.	
Diabetes	Assign Adult Diabetic Patients to Primary Care Practice to Ensure Continuity of Care	Yes	1 care manager and 2 diabetic nurse educators were added to facilitate care coordination and education for our diabetic patients	
Diabetes	Provide Care Coordination and/or Care Management Services	Yes	An Intensive Medical Weight Management Clinic has been opened at Bellevue. Services include: intensive lifestyle counseling and goal-setting;	

Significant Health Need Identified in 2013 CHNA	Planned Activities Listed in the 2013 Implementation Strategy	Was the Activity Implemented? (Yes/No)	Result or Impact	Supporting Data and Data Sources
			individualized nutrition and physical activity recommendations; and pharmacotherapy. Treatments are specifically tailored to a patient's cultural background, functional capacity, and other medical conditions.	
Diabetes	Develop Intensive Medical Weight Management Clinic	Yes	Through the use of a variety of process improvement tools and efficiencies the Bariatric Surgery Clinic TNAA for new visits has decreased to 17 days from a high of 51 days, a decrease of 66%.	Soarian
Diabetes	Expand Access to Bariatric Surgery Clinic	Yes	All Adult HTN Patients are referred to the Primary Care practice. A Cardiovascular Risk Registry was created to help track patient compliance. Patients in compliance has risen from 33.79% in 2014 to 62.0% at the end of CY2015	Cardiovascular Risk Registry
Hypertension	Connect Patients to Primary Care Providers for Continuity of Care and Disease Management	Yes	See Above	
Hypertension	Provide Regular Performance Reports to Primary Care Providers	Yes	Care plans are developed in consultation with the patient, their family and Bellevue physicians and nurses. The care plan is included in the Ambulatory Care notes and contains goals for patients and providers allowing both groups to set expectations and actions to meet the goals	
Hypertension	Develop Self-Care Plans in Collaboration with Patients	No	FTE and budgetary restraints prevented this from moving forward but is again under consideration for the new fiscal year	
Hypertension	Obtain Additional Dietician Support through Patient Centered Medical Home (PCMH) Initiative	No	This program is currently being implemented and is on track to come online by the end of 2016	
Hypertension	Develop Group Classes on Topics such as Healthy Cooking and Stress Management	Yes	We have actively been enrolling these patients in our Health Homes program. Each patient receives care management, care coordination, primary care, substance and mental health services as determined by the needs of the patient.	
Substance Abuse	Provide Care Management and Connect Patient to Regular Care through NYS Health Home Program (HH)	Yes	The program has the capacity to provide care coordination to 180 patients by care managers who comprise six full-time employees. There are three populations from which we can accept patients into the program: HIV-infected patients from the Virology Clinic (using set criteria for referral) in need of intensive care management, high-risk patients from the	

Significant Health Need Identified in 2013 CHNA	Planned Activities Listed in the 2013 Implementation Strategy	Was the Activity Implemented? (Yes/No)	Result or Impact	Supporting Data and Data Sources
			primary care clinic, and a New York State Department of Health list of high risk patients.	
Substance Abuse	Move Virology Community Follow-up Program (COBRA) Patients into the HH Model	Yes	Bellevue Hospital continues to be a leader in providing inpatient substance abuse services. In FY 2015 there were 2,247 adult discharges in our drug and alcohol detox program.	
Substance Abuse	Refer Patients to Inpatient Detoxification Services	Yes	The program was developed and implemented by Dr. Shonna Yin and teaches parents how to administer medicine to their children through the use of pictograms.	
Health Literacy	Teach Parents How to Administer Medication to Children through HealthPix Program	Yes	Through the use of Breakthrough and other process improvement initiatives we have been able to improve the tools used to educate patients throughout the hospital. Activities included ensuring all materials are written at the appropriate reading level, that patient materials are available in as many languages as possible and the use of pictures and diagrams that are easy to understand	
Health Literacy	Identify Effective Tools to Educate Patients/Family using Breakthrough Methodology	No	This effort was worked on within individual departments and through the Breakthrough process to determine best practices	
Health Literacy	Convene Patient Focus Groups to Ascertain Effectiveness of Education Materials	Yes	Implemented must complete screens in the EMR to offer testing to all patients 13 years and above	
Cancer Services	Screen Patients for Lifestyle Habits that are Known to Increase Cancer Risk	Yes	Through the use of Breakthrough and other process improvement initiatives we have continually worked to provide expanded access and best practices to the greatest number of patients possible here at Bellevue	
Cancer Services	Expand Access to Cancer Screening and Treatment through Cancer Program	Yes	Hospitals/Bellevue Cancer Center include: <ul style="list-style-type: none"> • Psychiatry and psychology • Genetic counseling for patients at high risk of cancer • Social work • Nutritional counseling • Art therapy • Patient navigators • Legal health support Patients have the opportunity to participate in cutting-edge clinical research trials evaluating new and potentially more effective	

Significant Health Need Identified in 2013 CHNA	Planned Activities Listed in the 2013 Implementation Strategy	Was the Activity Implemented? (Yes/No)	Result or Impact	Supporting Data and Data Sources
			approaches to diagnosing and treating cancer.	
Cancer Services	Improve Outreach, Education, Access and Coordination of Services	Yes	Through process redesign overall TNAA for our cancer services has declined in many areas, though some still lag. A small example of improvements are New Breas CA Clinic visits went from 38 days to 15 days, GYN from 43 days to 25 days and Neuro Onc from 31 days to 16 days.	
Cancer Services	Implement Referral and Scheduling Guidelines to Decrease Wait Time for Appointment	Yes	The BHC Nutrition and Fitness Program (BENUFIT) provides comprehensive evaluation and treatment for children and youth with weight management programs.	
Obesity	Provide Comprehensive Evaluation and Treatment for Children and Youth through the BHC Nutrition and Fitness Program (BENUFIT)	Yes	See responses from above for Bariatric. Medical weight management TNAA has not decreased.	
Obesity	Improve Access to Weight Management Clinic, Dietary Services and Bariatric Surgery	Yes	Implemented must complete screens in the EMR to offer testing to all patients 13 years and above	
HIV/AIDS/STDs	Screen All Adults in Emergency, Inpatient and Outpatient Settings for HIV/AIDS	Yes	The HR program offers the following services: individual and group education and counseling, buprenorphine treatment support, syringe exchange, overdose prevention including naloxone kits, nicotine replacement therapy (NRT), referrals to substance use treatment and other services (both hospital- and community-based), and care coordination.	
HIV/AIDS/STDs	Increase Patient Involvement in HIV Harm Reduction, Recovery Readiness and Relapse Prevention Program (HRR)	Yes	Bellevue has increased its HIV screening from 15,889 patients in FY13 to 18,378 in FY15 Bellevue is also above NYC benchmarks in most all STD screening categories for HIV patients. Examples includes 97.1% for HepC, 80% for Syphilis and 58.1% for Chlamydia	HIVQual
HIV/AIDS/STDs	Screen Patients Annually for STDs	No	This program was not implemented due to other best practices identified.	
HIV/AIDS/STDs	Improve Accuracy of STD Screening Tests for Men who have Sex with Men by Employing Rectal Swab Test	Yes	Bellevue has significantly increased the numbers of patients screened in the primary care setting resulting in a 12% case finding for appropriate depression screenings. There has been a significant increase in referrals to the psychiatrist and social worker embedded in Primary Care	Quadramed

Appendix 4. Community Resources

Appendix 4 is a listing of health and social services available to low-income, uninsured, and underinsured individuals in the neighborhoods included in the primary service area of NYC Health + Hospitals, sorted by borough and neighborhood. Organization services are in the following categories: Dental, Vision, Adult Day Health, Health center, Insurance enrollment, Home Health, Hospital, Nursing Home, Prescription Drug, Immigration Support, Mental Health-Inpatient, Mental Health-Ambulatory, Substance Use, Social Services, Financial Assistance, and Wellness/Prevention.

NYC Health and Hospitals Corporation Community Health Needs Survey

The New York City Health and Hospitals Corporation (HHC) is conducting this survey as part of a community health needs assessment. The information that you provide will help HHC to better serve you and members of your community.

The survey is voluntary and confidential. You do not have to complete the survey, and you can skip questions you do not want to answer. Your name will not be written on the survey, and we will not be able to connect your answers to you personally.

It will take about 15 minutes to complete this survey. In appreciation of your time and effort, you will receive a \$5.50 MetroCard for completing this survey.

1. In general, would you say that your health is:

- Excellent Good Fair Poor

2. Do you currently have health insurance?

- Yes No Don't Know

2a. If yes, what type of insurance do you have?

- Medicaid
 Medicare
 Private insurance through my employer or my spouse's employer
 Private insurance through the NY State Exchange (Obamacare)
 ADAP or other NY State AIDS Insurance Assistance
 Other (please specify) _____

3. Have you seen a personal doctor or your regular doctor in the past 12 months for a visit (for example, for an annual check-up or for a medication refill)?

- Yes No Don't know Prefer not to answer

4. Have you seen a dentist in the past 12 months?

- Yes No Don't know Prefer not to answer

5. Do you have children under the age of 18 living with you?

- Yes No

5a. If yes, are you able to get an appointment with your child's doctor when you need to?

- Always
 Sometimes
 Never

6. Based on your experience with your family, friends, and neighbors, please rate each of the following health issues based on how serious and/or widespread they are ***in your community.***

	Very serious	Somewhat serious	Not serious	Don't know / Not applicable
Heart disease, high cholesterol, stroke				
Cancer
